Seasons of a Magical Life

A Pagan Path of Living

H. Byron Ballard

Foreword by Amy Blackthorn, author of *Blackthorn's Botanical Magic*

- Part Pagan reverie, part practical guide to living in harmony with the natural world
- Offers practical activities and suggestions

An invitation to earth-based spirituality and ritual living, for all those who are inspired to reconnect with the seasons, whether they live in the country, the city, or anyplace in between.

Seasons of a Magical Life looks at the Wheel of the Year and its basis in agriculture as a starting point for a deepening spirituality. Folklorist H. Byron Ballard offers a set of backstories to ease the reader into a time between the pre-industrial era and the modern one, into a place where the fast-moving stress of contemporary life can be affected by a better connection not only to the natural world but to the elegant expression of the year through seasonal festivals and celebrations.

The chapters are broken into the four seasons and feature simple skills that accompany each marker in the year. The author provides advice on spiritual and physical immersion into the seasons that applies to readers from all areas: rural, urban, and suburban.

This is also a deeply practical book, including insights into the following:

- Food: cooking, preserving, foraging, the summer kitchen, mushrooms and mycelium
- Fiber arts: knitting, crocheting, spinning, weaving, decorative cut-work, and embroidery
- Sewing: treadle machines, electric machines, hand sewing
- Household crafts: candle-making, soap-making, broom-making, sharpening tools
- Farming and gardening: composting, manure, soil preparation, pests, seed-saving
- Health: medicines, tending the dying, death and death rituals

"This book is an invitation to modern Pagans to return to a simpler and quieter time, either literally or virtually." —from the foreword by Amy Blackthorn, author of *Blackthorn's Botanical Magic*

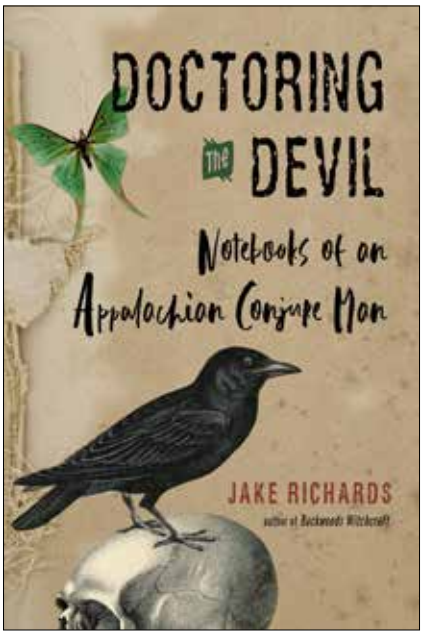
Doctoring the Devil

Notebooks of an Appalachian Conjure Man

Jake Richards, author of *Backwoods Witchcraft*



- For all those interested in conjure, root work, folklore, and authentic teachings drawn from the uniquely American heritage of Appalachia

Appalachian conjure man Jake Richards takes us deeper into the backwoods, sharing root work practices and spells of traditional folk craft magic.

Who were the old conjurors and witches of Appalachia? What were their practices and beliefs? How can you learn the ways of conjuring for yourself? In *Doctoring the Devil*, Jake Richards speaks to those questions and more, offering the various ways of rooting out the "devil"—any unfriendly spirit bringing bad luck, poor health, and calamities of all sorts.

Like the blue smoky mists that glide up the Appalachians, Jake leads his readers up the hillsides too, introducing us to folks along the way. We'll also meet the local spirits and learn root ways. Further up the hill, we delve into Jake's notebooks—a personal collection of tried-and-true Appalachian recipes and roots for conjuring love, money, justice, and success.

Wild Soul Runes

Reawakening the Ancestral Feminine

Lara Veleda Vesta

- An in-depth guide to building a spiritual and ritual relationship with the runes from the founder of the Wild Soul School
- Includes original translations of traditional rune poems

This book highlights the feminine origin of the runes in the context of an immersive course in rune practice.

Using inquiry and original translations alongside traditional rune poems and sacred art, *Wild Soul Runes* invites readers to develop their own wisdom connection with the runes through practice.

Rather than telling the reader what the runes mean, author Lara Veleda Vesta shares an interactive practice for readers to discover the unique ways that the runes speak to them. Readers will learn how to:

- Make a rune altar
- Develop a daily ritual practice with the runes
- Craft a rune set and rune ceremonies for divination

The Ancient Alien Question 10th Anniversary Edition

An Inquiry into the Existence, Evidence, and Influence of Ancient Visitors

Philip Coppens

Foreword by Erich von Däniken, Preface by Kathleen McGowan

- Philip Coppens was a mainstay commentator for *Ancient Aliens* for 4 years
- New preface by Philip's widow, renowned author Kathleen McGowan, and an afterword that contains the last essay Coppens wrote

"An important and outstanding contribution." —Erich von Däniken, bestselling author of *Chariots of the Gods*

"*The Ancient Alien Question* provides a captivating adventure around the world and sheds an interesting perspective on the Ancient Astronaut Theory." —Giorgio A. Tsoukalos, producer of *Ancient Aliens: The Series*

"Philip Coppens covers all the bases on this controversial topic. His research is thorough and he addresses each topic with a balanced overview that cuts through the jungle of confusion with a very sharp machete of reason." **—David Hatcher Childress**, author of *Technology of the Gods*

Originally published in 2011, *The Ancient Alien Question* reveals an array of astonishing truths, including:

› A radically different understanding of the pyramids and how they were constructed

› The extraordinary stories behind monuments such as the Nazca lines and Puma Punku

› How extraterrestrials came to our planet and the evidence that supports this

Analyzing the historical and archaeological evidence, Philip Coppens demonstrates that there is substantial proof that our ancestors were far more technologically advanced than is currently accepted, and that certain cultures interacted with nonhuman intelligences. Our ancestors were clearly not alone.

Fifty years after Erich von Däniken posed these questions in *Chariots of the Gods*, Coppens provides clear, concise answers to the great historical enigmas in an accessible, readable format. This new edition features a foreword by Kathleen McGowan, along with a new afterword that is the last essay Philip Coppens wrote.

The Animals Are Leaving Us

Martin Rowe

Photographs by Jo-Anne McArthur

A poetic reflection and examination of the omnipresence and yet the vanishing of animals within and from an environment entirely defined by the whims and appetites of human beings.

For four years beginning in January 2017, writer and publisher Martin Rowe documented the state of the United States and the world—using the verse form of ottava rima. In June 2019, he dedicated thirty of those verses to two extraordinarily compelling and distressing photographs of animals in extremis taken by Canadian photojournalist Jo-Anne McArthur. Now expanded to include more verses and more of McArthur's stunning images, *The Animals Are Leaving Us* forms a testament to the particular moments in the lives and deaths of individual creatures, and a requiem for the many billions of animals who are subject to the cruel whims of our species, and who are vanishing from the wild places of the earth.

About the Author and Photographer

Martin Rowe is the cofounder of Lantern Publishing & Media. He is the author of several books including *The Elephants in the Room: An Excavation*, and *The Polar Bear in the Zoo: A Reflection*, which also explores the photography of Jo-Anne McArthur. **Jo-Anne McArthur** is an award-winning photojournalist, sought-after speaker, and the founder of We Animals Media.

"A wonderful and important book." **—John Robbins**, author of *Diet for a New America*

Confessions of an Animal Rights Terrorist

Karen Levenson

This book is a searing memoir of an animal rights campaigner's effort to stop Canada's seal hunt, while handling domestic abuse and her partner's long-term illness. The Supremacist Syndrome

How Domination Underpins Slavery, Genocide, the Exploitation of Women, and the Maltreatment of Animals

Peter Marsh

Proponents of human exceptionalism claim that only humans possess certain morally significant capacities, and as such are entitled to be treated better than all other species. In the last fifty years, scientists have discovered how these capacities are not unique to humans, which only raises the questions of how and why we evade responsibility for inhumane behavior. Author Peter Marsh presents a careful and compelling examination of how human supremacism underlies ideologies such as anti-Semitism, genocide, racism, misogyny, and cruelty to animals.

Stubborn Grace, A Memoir

Faith, Mental Illness & Demanding a Blessing

Kate Landis

A hopeful memoir of mental illness that doesn't shy away from serious topics but instead approaches them with humor and grace.

Kate Landis grew up in the American Baptist Church, the child of a music director and a deacon. She left the church in her late teens, after surviving major depression and a handful of suicide attempts. She became an activist, feminist, punk, and self-described rabble-rouser, and through activism found a spiritual community with justice at its core and a faith that could hold it all—her mental illness, her fire, her spunk, and all of her questions—a loving, stubborn grace.

With unflinching honesty and humor in the vein of Cheryl Strayed and David Sedaris but a raw tenderness all her own, Landis chronicles the hardest parts of her young adulthood as well as her poignant journey to faith and community.

About the Author

Rev. Kate Landis is interim minister at UU Church of Akron, Ohio, having formerly served Shoreline UU Church in Shoreline, Washington, and as a chaplain at Swedish Hospital in Edmonds, Washington. She won the Skinner Sermon Award, presented annually to the preacher of the sermon best expressing Unitarian Universalism's social principles, for her sermon "Resilience and Religious Freedom."

A method to find and connect the small data clues that show what the future's big picture will look like.

"Strategy decisions are like playing high-stakes blackjack, and scanning is the technique for counting cards. Martin Schwirn isn't a pro gambler, but an expert in scanning." **—Bill Ralston**, cofounder of Strategic Business Insights and author of *Scenario Planning Handbook*

Small Data, Big Disruptions provides the information needed to anticipate the future, understand tomorrow's market dynamics, and make the necessary decisions to meet the future on your terms. This book presents a tool kit to foresee coming changes:

› Understand why big data will not help you with understanding tomorrow's disruptions: the future starts with small data—first
› Learn the proven 4-step process to capture small data that help envision the future
› See examples of how the process anticipated major disruptions
› Implement the process in your organization and learn how to initiate meaningful actions

Small Data, Big Disruptions helps you see emerging disruptions and trends before they impact your business. It's the difference between being ahead of the curve and struggling to catch up.

Joanne Dimaggio

This book is a fascinating examination of why one of Edgar Cayce's most personal predictions never came true. For those who make the assumption that a soul that reaches the greatness of a Thomas Jefferson would continue its upward trajectory, this book clearly illustrates the role that free will plays in the outcome of any life. It is a classic case of karma in action.
